

HIGH VOLTAGE TEST SET (HIPOT TESTER)

- HIPOT Tester is essential electrical safety testing instrument that are used to verify that the electrical insulation of a product in an electric circuit is adequate to withstand high voltage without breaking down. HIPOT is therefore an essential tool for predictive maintenance of existing electrical utility and equipment assets.
- Available from 0-5 kV to 0-75kV
- Operating Voltage 1PH 230V
- For more than 5kV, the set is supplied in two separate parts.

HIGH VOLTAGE AC / DC TEST SET
