COIL SET & CORE COIL ASSEMBLY- DT/NGT (VPI/CRT)

RESIN CAST DRY TYPE NEUTRAL GROUNDING TRANSFORMERS (NGT) UPTO 200KVA AND 36KV

- Neutral Grounding Transformers are auxiliary Transformers used in three phase distribution systems to provide a neutral Point.
- Range: 36kV, Rating 200KVA.
- NGT coils are cast under vacuum with high quality epoxy resin mixture prepared under vacuum in sophisticated mixing plant.
- These units are type tested for Impulse test (170kVp) and short circuit tested.
- Connections: 3PH, ZigZAG & 3PH Star Delta.

**NEUTRAL
GROUNDING
TRANSFORMER**

TECHNICAL SPECIFICATIONS

Reference Standard	BIS, BS, IEC, IEEE
Voltage Class	36kV
Test Voltage	70kV RMS & 170 kVp
Rated Primary Current	23500V
Rated Secondary Current	500V
Insulation Class	A, B, F, H, C
Frequency	50 Hz & 60Hz
